PROFESSIONAL SUMMARY

Computer Science undergraduate with a CGPA of **8.60** and strong expertise in **MERN Stack Development**. Experienced in building full-stack web applications using React.js, Node.js, Express.js, and MongoDB. Passionate about scalable software development, REST APIs, authentication systems, and solving real-world engineering problems.

EDUCATION

Jaypee University of Information Technology
Bachelor of Technology in Computer Science Engineering

2024 – 2028
CGPA: 8.60 / 10

TECHNICAL SKILLS

Languages: C++, JavaScript, Python, HTML5, CSS3

Frontend: React.js, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Database: MongoDB, MySQL

Developer Tools: Git, GitHub, VS Code, Postman, Vercel, Render

Core CS: Data Structures, Algorithms, OOP, DBMS, Operating Systems, Computer Networks

PROJECTS

Campus Infrastructure Complaint Tracker *MERN Stack*
GitHub Live Demo

- Built a full-stack campus complaint management system using React.js, Node.js, Express.js, and MongoDB with secure JWT-based authentication.
- Implemented role-based access control for Students, Administrators, and Maintenance Staff with dedicated dashboards.
- Developed complaint submission, assignment, status tracking, notifications, and analytics modules using RESTful APIs.
- Designed responsive user interfaces and deployed the application using Vercel, Render, and MongoDB Atlas.

Professional Portfolio Website *React.js*
GitHub Live Demo

- Designed and developed a responsive portfolio website to showcase projects, technical skills, certifications, and contact information.
- Implemented reusable React components, responsive layouts, and smooth navigation to enhance user experience.
- Optimized performance and deployed the application on Vercel for seamless accessibility.

AI-Based Health Risk Assessment System *Python, Machine Learning*

- Developed a machine learning application to predict breast cancer and lung cancer risk using healthcare datasets.
- Performed data preprocessing, feature engineering, and trained Logistic Regression and Random Forest models.
- Built an interactive Streamlit interface for real-time health risk assessment and prediction.

CERTIFICATIONS

- **TATA GenAI Powered Data Analytics Job Simulation** – Forage

ACHIEVEMENTS

- Built and deployed multiple Full Stack MERN applications using React.js, Node.js, Express.js, MongoDB Atlas, Vercel, and Render.
- Maintained a CGPA of **8.60/10** while actively developing industry-level software engineering projects.
- Strong understanding of REST APIs, JWT Authentication, Role-Based Access Control, and Responsive Web Development.
